

What are you working on?

Describe your task and we'll route you to the right AI agent for it.

e.g. "write copy for my CTA"

Find my agent →

AI Buddies are HP's custom AI agents. Try an example:

"Write friendlier copy for my CTA button"

"Analyze our latest CSAT survey results"

"Validate my prototype for accessibility issues"

UX Writing & Copy

Craft clear, on-brand microcopy for buttons, errors, empty states, and product moments.

2 agents

Copy variants & A/B testing

Generate copy alternatives ready to drop into an A/B test with rationale for each.

2 agents

Layout exploration

Sketch multiple layout directions for a screen before you commit to one.

2 agents

Job stories & JTBD

Craft outcome-driven job stories that align product decisions with real user needs.

3 agents

CSAT & feedback analysis

Analyze customer survey data to uncover sentiment patterns and actionable themes.

Usability & accessibility

Test designs for usability issues, accessibility gaps, broken flows, and friction points.

4 agents

User perspective feedback

Get realistic feedback from PSP owners, production managers, ITDMs, and architects.

2 agents

Product strategy

Validate roadmap decisions, prioritize features, and define growth metrics.

AI workflow optimization

Find tasks to automate and workflows to accelerate with AI tools.

Team onboarding

Help newcomers get started smoothly with clear, reliable guidance.

Infrastructure review

Evaluate designs from an enterprise IT and infrastructure perspective.
